

# Heat exchanger stainless steel 316 1" x 1 1/2" female thread MF 135 (0891971)

# TECHNICAL SPECIFICATIONS

Material	stainless steel 316
----------	---------------------

Pressure secondary system	5 bar
---------------------------	-------

Connection	female thread
------------	---------------

Pressure primary system	10 bar
-------------------------	--------

Model	MF 135
-------	--------

Capacity kW/h at $\Delta t=60^{\circ}\text{C}$	40 kWh
--	--------

Flow primary system	25 ltr/min
---------------------	------------

Flow secondary system	200 ltr/min
-----------------------	-------------

Size	1" x 1 1/2"
------	-------------

Size secondary system	1 1/2 "
-----------------------	---------

Size primary system	1 "
---------------------	-----

## DIMENSIONS

A	355 mm
---	--------

B	129 mm
---	--------

C	171 mm
---	--------

## PRODUCT INFORMATION

Easy to install heat exchanger with tubes of European quality. The Maxi-Flo heat exchanger can only be positioned vertically. The Maxi-Flo heat exchanger can be used to heat your pool by using, for example, the heating of your home. A heat exchanger can quickly heat up the water. In 24 to 48 hours you can reach a water temperature of 28°C. The heat exchanger is therefore an excellent solution if your pool is not used frequently (e.g. weekends only). The Maxi-Flo heat exchangers are also compatible with low temperature circuits of existing geothermal systems or heat pumps. Suitable for chlorine based pools.
