

Water Lily® taps box 6 pcs (7002208)

PRODUCT INFORMATION

Thanks to its microfibres specially treated to retain fat molecules, Water Lily® is a highly-efficient specific absorber of the oily substances found on the water's surface allowing it to stay pure and clear. Its particular flower shape increases the perimeter where residue concentrates.

Thanks to its lipophilic and hydrophobic properties, Water Lily®'s fibrous matter absorbs all the oily substances from the water's surface without the need of chemical products.
