

Heat exchanger stainless steel 316 male thread x female thread HF 28 (0891980)

TECHNICAL SPECIFICATIONS

| | |
|--|-----------------------------|
| Material | stainless steel 316 |
| Colour exterior | black |
| Pressure secondary system | 8 bar |
| Connection | male thread x female thread |
| Pressure primary system | 30 bar |
| Model | HF 28 |
| Capacity kW/h at $\Delta t=60^{\circ}\text{C}$ | 28 kWh |
| Flow primary system | 25 ltr/min |
| Flow secondary system | 300 ltr/min |
| Size secondary system | 1 1/2 " |
| Size primary system | 1 " |

DIMENSIONS

| | |
|---|--------|
| A | 407 mm |
| B | 129 mm |
| C | 263 mm |

PRODUCT INFORMATION

Hi-Flow is a well-tried and tested heat exchanger with effective heat transfer capabilities. It is intended for swimming pools and other applications where there is a demand for high capacity together with a low-pressure drop. All models can be installed together with boilers, heat pumps, solar panels or other heat sources. These heat exchangers are light and compact. The material used - acid proof stainless steel AISI 316 - is chosen with regard to working conditions where there is a risk of corrosion. Stainless steel adjustable fixings are included. Suitable for chlorine based pools. Horizontal Mounting only.
