

Coarse filter 1/2" (7023835)

TECHNICAL SPECIFICATIONS

Size

1/2"

PRODUCT INFORMATION

The floating suction filter ensures that the cleanest water, from just below the surface, is always drawn from the tank. Its built-in filter protects the pump as well as toilet and washing machine inlet valves, against potential contaminants in the tank water. The filter mesh width is selected to ensure maintenance intervals are minimized. The brass backflow valve prevents the intake line from running dry.
