| Material                | glass-filled nylon                 |
| Material filter element | stainless steel                    |
| Filtration              | 75 micron                          |
| Filtration              | 200 mesh                           |
| Material housing        | glass-filled nylon                 |
| Connection              | female thread x male thread        |
| Minimum inlet pressure  | 1.4 bar                            |
| Pressure                | 10 bar                             |
| Type                    | XCZ-100-Pressure regulating filter |
| Capacity                | 57 l/min                           |
| Size                    | 1"                                 |

## PRODUCT INFORMATION

The Rain Bird Control Zone Kits type XCZ are a unique, easy-to-turn patented pressure assisted flow control mechanism (DVF models only).

The control kit includes a valve and a pressure regulating filter.
