

Control system 230VAC white type SC 20 (7023842)

TECHNICAL SPECIFICATIONS

Colour	white
--------	-------

Type	SC 20
------	-------

IP value	IP54
----------	------

Max. Performance	850 Watt
------------------	----------

Length	265 mm
--------	--------

Voltage	230VAC
---------	--------

Height	595 mm
--------	--------

PRODUCT INFORMATION

The RAINMASTER Favorit models 20 and 40 feature automatic operating and monitoring stations with a pump, controller, and built-in mains water supply. They can be wall mounted in a small space. The water is drawn by the pump from the tank via an intake suction hose. The new RAINMASTER Favorit SC is equipped with a speed controller, instead of a pressure and flow control device. The speed controller regulates the speed of the pump to adjust the pressure to the required flow rate.
