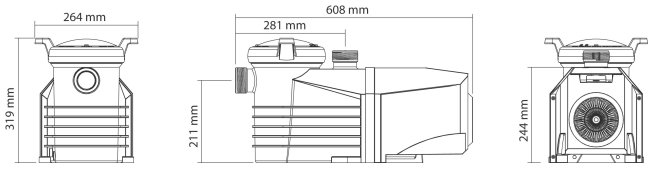
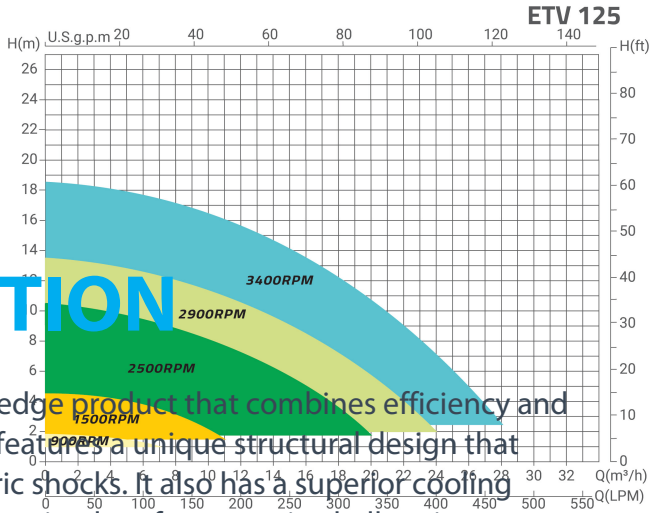
TECHNICAL SPECIFICATIONS

Colour	black
Pump body	ABS/stainless steel
Material impeller 1	polycarbonate
Material seal	EPDM
Connection	glue connection
Length	608 mm
Voltage	230VAC
Max. temperature	40 °C
Width	264 mm
Weight	20 kg
Height	319 mm
Frequency	50 Hz
Motor RPM	800-3400
Type	ETV 125
Output Power	1.25 HP
Size	50/63 mm
Power	0.75 kW

Ampere	2,6 A
Max flow rate	28 m^3/h





PRODUCT INFORMATION

The Flotide E-Turbo variable speed pump is a cutting-edge product that combines efficiency and reliability through the use of a fully inverted motor. It features a unique structural design that reduces noise, increases durability and prevents electric shocks. It also has a superior cooling system that extends the life of the pump and ensures optimal performance in challenging conditions. The removable panel offers easy installation and access to controls, making maintenance and adjustments simple and convenient.

Features:

- Modbus and Wifi connection
- Noise level < 50 dB
- Transparent lid with ring lock
- 3ltr strainer
- Air ventilation through back cover to improve cooling efficiency
- Detachable control panel
- Permanent magnetic motor
