Hunter®

 **bosta**
bringing water to life

TECHNICAL SPECIFICATIONS

Type	PSR-52
Suitable for	up to 2.2kW 230VAC
Voltage	400VAC

PRODUCT INFORMATION

Rely on the Hunter Pump Start Relay If your irrigation system needs to pump water from a source such as stream, pond or the soil, you want a relay that guarantees the best pump activation. An application you can rely on. One you as rugged as the land you are watering. The Hunter Pump Start Relay (PSR) offers that reliability. The PSR is available in three models, so there is always one that accommodates for the different flow-rate sources and a wide range of landscape projects. The PSR is also fully compatible with all standard 24 VAC controllers. The straightforward wiring means the PSR is suitable for most assembly specifications. Specifications of the Hunter Pump Start Relay - Closable NEMA-rated casing. - A family of pump start relays for a wide range of power and flow requirements. - 24 separate VAC cables mean a quick and easy connection to the controller. - Suitable for conventional wiring or two-wire decoder activation, allowing flexible installation options. - Offers a solution for installations with sprinkler regulators and pump start relays that do not have enough power to activate the pump.
