

Tangit Expansion resin grey type M3000 (0069995)

TECHNICAL SPECIFICATIONS

Colour	grey
Type	M3000
Volume	300 ml

PRODUCT INFORMATION

Innovative two-component expanding resin for sealing cable and pipe penetrations. Hardens quickly (approx. 5 minutes) and reaches full strength within 30 minutes. Provides high mechanical resistance (tensile strength up to 30 kN, torque of 240 Nm) as well as gas and water tightness (tested up to 1 bar in combination with a sealing hose). Resistant to oils, water, solvents, and high temperatures (650°C for 30 minutes). Ideal for repairs, including from the inside, even on damp surfaces. One tube (300 ml) yields approximately 1.5 litres of ready-to-use compound, does not shrink, and ensures precise mixing ratios. Certified by the Fraunhofer Institute and DVGW (VP601).
