------------	-------

Maximum ambient temperature 35 °C

Pressure	4 bar
----------	-------

Size	32 mm
------	-------

Length	100 m
--------	-------

Inner ø	28 mm
---------	-------

Punched	25 cm
---------	-------

Wall thickness	2,0 mm
----------------	--------

PRODUCT INFORMATION

Application: pre-punched LPDE is mainly used with button dripper or button dripper sets as well as micro sprinklers with barbed connections.

White LDPE: white colour is preferred as it reflect the light towards the crop which is beneficial for its growth, black LDPE on the other hand absorbs light but its more resistant to bacterial growth in the tube.
