

**Solar heater UV resistant vinyl
32/38 mm hose tail 0,3bar
black 1,28m type Quick SB003
(7018974)**

TECHNICAL SPECIFICATIONS

Colour	black
Type	Quick SB003
Material	UV resistant vinyl
Connection	hose tail
Length	1,28 m
Width	0.8 m
Pressure	0,3 bar
Volume max.	3.8 m ³
Size	32/38 mm

PRODUCT INFORMATION

The solar collector blanket is the simplest way of converting solar energy into swimming pool heating. It works in combination with a filter pump. The heating capacity depends on the weather conditions. One solar collector blanket is suitable for swimming pools with volumes of up to 4,500 litres of water. The solar collector blankets can be linked in series for greater heating capacity. Easy to fold up and stow away after use.
